Here are simple examples showing usage of PostgreSQL Bitwise Operators:

```
testdb=# select 60 | 13;  
?column?
```

```
-----  
        61  
(1 row)
```

```
testdb=# select 60 & 13;  
?column?
```

```
-----  
        12  
(1 row)
```

```
testdb=# select (~60);  
?column?
```

```
-----  
       -61  
(1 row)
```

```
testdb=# select (60 << 2);  
?column?
```

```
-----  
       240  
(1 row)
```

```
testdb=# select (60 >> 2);  
?column?
```

```
-----  
        15  
(1 row)
```

```
testdb=# select 60 # 13;  
?column?
```

```
-----  
        49  
(1 row)
```
